Summary

Detail-oriented Full-Stack Web Developer with 2+ years of experience building and maintaining web applications using technologies like React, Node.js, PHP, and Python. Proven ability to contribute to both front-end and back-end development, including UI integration, feature implementation (authentication, notifications), and database management. Currently enhancing skills through a Software Development program at BYU-Pathway Worldwide.

Experience

Experienced Full-Stack Web Developer Solar Transit Africa Ltd | Antananarivo May 2023 - Now

- Contributed significantly across multiple key web projects, applying full-stack development expertise. with teams to build, test, and deploy features, enhancing overall platform functionality and user engagement.
- solarpool.mu**: Executed the integration of the user interface, ensuring seamless front-end/back-end connectivity.
- mbs457.mu**: Developed substantial portions of both the back-end architecture and the user interface.
- solardropshipping.com**: Designed and implemented the supplier administration UI; developed and integrated a platform-wide notification service.
- pvgis.com**: Integrated the user authentication system, contributed to simulation logic, and implemented PDF report generation functionality.
- solarcenter.mu**: Built an application to manage and track the lifecycle of site visits required for determining optimal solar panel placement for clients.

Personal Projects

GitHub Finder – Web application for finding GitHub users (github) Course Project

- Design, development and deployment of a GitHub user search web application using **ReactJS, HTML, CSS** and the **GitHub API**. Allows users to search for GitHub users by username.

GameHub – Video game discovery web app (github) Course Project

- Design, development and deployment of a video game discovery web application using ReactJS and Typescript. Allows users to search for games by platform, genre and other criteria. Use of third-party APIs to retrieve game information and images.

Education

Institut Supérieur de l'Informatique et du Management d'Entreprise (ISIME) Dec 2019 - Dec 2022

- Acquired solid computer science fundamentals (software development, databases, algorithms, data structures) through practical coursework and projects. Gained foundational web development skills.

BYU-Pathway Worldwide Aspiring Software Developer Sept 2024 - Now

- Currently enrolled in a Software Development program at BYU-Pathway Worldwide, actively acquiring essential skills in programming principles and software design. Coursework includes Introduction to Programming, Web Fundamentals, and Object-Oriented Programming, laying a strong foundation for future software development projects.

Skills and Technologies

Languages: TypeScript, JavaScript, PHP, Python

Front-End: React, Next.js, Angular, HTML, CSS, tailwindcss

Back-End: Node.js, Fastapi, Laravel

Databases: NoSQL (MongoDB), SQL (MySQL, POSTGRESQL)

Tools & Concepts: Git, Github, Docker, Microservices Architecture, Vim, Figma, Photoshop

Additional Skills

Soft Skills

- Passionate, Fast Learner, Problem Solving, Collaboration / Teamwork, Rigorous, Adaptability, Attention to Detail
